MAKE WATER YOUR BUSINESS

WHAT ROLE DOES WATER PLAY IN YOUR HOME, SCHOOL, OR WORK?
 WHAT WOULD YOU CHANGE ABOUT WATER IN YOUR AREA?

- Valuing water starts with understanding where water comes from and how every drop counts. During your spare time, visit the Water Wise website to learn more about water.

- Take initiative by joining river and wetland clean-up campaigns in your area. Find out more about these campaigns from your local municipal offices and get your friends and families involved.

- Pay for water services. Water that comes from the tap has to first undergo a purification process, which requires the use of pipes, pumping, treatment plants and reservoirs.

- Don't waste water. Take action by practicing water saving principles such as closing the tap while brushing your teeth or taking a 5 minute shower. These small changes will go a long way.

- Respect water, respect life. Everything on Earth relies on water for survival. This includes industries, agriculture, businesses, the natural environment, plants, and animals. Nothing can live without water.

- Don't pollute water. Make sure you throw any type of litter in a bin, and always recycle where you can. If you use disposable masks, dispose of them responsibly.

HOW DOES WATER PLAY A ROLE IN YOUR CULTURAL PRACTISES?
 WHAT ROLE WILL WATER PLAY IN YOUR FUTURE?
